P2PE from Global Payments Introducing Our Fully Validated Solution

Our P2PE solution complies with the latest global payment security standards and is listed on the Payment Cards Industry Security Standards Council website. You can be assured that sensitive cardholder data is secure as it's never stored in your payment environment.

Each individual transaction is fully encrypted - from the moment the card data touches the device - and remains encrypted until it reaches our payment gateway. Meaning secure point-to-point transactions.

Businesses taking payments using a point of sale system must be assessed annually to ensure they're compliant with Payment Cards Industry Data Security Standard (PCI DSS). With our P2PE solution, maintaining PCI compliance is easy, because there is a significant reduction in the merchants PCI scope as several criteria needed for a successful assessment are automatically met.

Key Benefits:

- Fully PCI Listed P2PE v2 solution. You get peace of mind - because the solution is listed by the PCI Council
- Easy PCI Compliance. Eases the PCI journey by vastly reducing the scope of your annual PCI assessment and helps avoid any PCI DSS non-compliance fees.
- Asset Tracking. We'll send you a quarterly report of all your devices, to help with your terminal estate tracking and management. Our solution and managed processes ensure a full chain of custody and lifecycle tracking of the devices.
- Semi Integration. P2PE devices can be used as part of a Semi Integrated solution for both POS Link, PAY Now, Tablet and Kiosk.
- Available on our full range of **Ingenico Tetra devices**, which includes:
 - o Desk 5000
 - o iPP315
 - o Move 5000
 - o Move 3500
 - o Lane 3000
 - o Link 2500
- The P2PE applications include:
 - o Dynamic Currency Conversion - we're currently the only provider to offer this
 - o Tax Free
 - o TruRating
 - o Pennies
 - o Gift Card

Support
